Who are we?

Mass Power Save, LLC is the premier retailer of renewable energy saving products. We provide quality tested and certified products directly to the consumer, at a price affordable to everyone.

Mass Power Save, LLC is dedicated to making Renewable Energy and Energy Savings a reality for everyone in America. We Make Renewable Do-able!

"Waiting on the utility company to inspect my solar panels gave me a month of running only with the PowerSave 1200 installed. The results were amazing!!! Compared to same month last year I saw a reduction from 2800 to 2100 HW hours. **That's a reduction of 25%!!!** This will only serve to increase the amount of savings I will see once my solar panels go online.

The PowerSave 1200 is proving to be a most worthwhile investment. Thanks a bunch..."

The PowerSave 1200™ for Residential Applications.

The PowerSave 1200™ is a small gray box that fits neatly next to your breaker panel, saves you money year after year and protects the entire home.

The PowerSave 1200™ was designed with the homeowner in mind, providing lower energy bills, increased motor and appliance life, for all of the equipment inside of your house.

Residential customers throughout North America could see a realized savings of 8% - 10% typically and as much as **25%** on their electrical usage (and thus power bills). The **PowerSave 1200™** is UL Certified as the Cat. No. ABET 2201 and CSA certified.

Money isn't all that you are saving when you use Mass Power Save products. It's an energy-wise purchasing decision with many positive environmental implications.

Power Suppliers also benefit by being able to supply power to more customers without the generation or acquisition of additional power.

We have Commercial Units

for large buildings and businesses. Contact us today to find out more!

How Does the PowerSave Unit Work?

The PowerSave reduces the amount of power drawn from the utility by storing (in its capacitors) otherwise lost electricity (watts) caused by the inductive motors in your home. The technology applied by the **PowerSave 1200™** Unit supplies that stored electricity back to your inductive loads, thus causing you to decrease your demand from the utility. If you decrease your demand from the utility, your meter slows down, and you use less electricity. The thought is, *you've already paid for that electricity*, why pay for it and waste it when you can pay for it, store it, and reuse it again.

Why haven't I heard of these product until now?

That's easy, two words "cost effectiveness". Up until recently, electric rates throughout America were cheap, costing us 2, 3 or 4 cents per kilowatt-hour. Now, electric rates are 8, 10, 12, 14, and 19 and in some cases New York City is 22 cents per Kwh, and Hawaii is 33.5 cents per Kwh. At the cheaper rates the PowerSave didn't make sense, but at the current rates, it makes all the sense in the world.

The PowerSave 1200™ Unit has a 5 year Manufacturers Warranty for full replacement.

We even have a 60-day money back guarantee. If, in 60 days, you don't see reduction in usage on your electric bill, call us and let us know, and we'll give you details on how to return the unit for a full refund of the purchase price*.

**Installation cost will not be refunded.*
