how to save on
your electric bill
every month?

Who are we?

Mass Power Save, LLC is the premier retailer of renewable energy saving products. We provide quality tested and certified products directly to the consumer, at a price affordable to everyone.

Mass Power Save, LLC is dedicated to making Renewable Energy and Energy Savings a reality for everyone in America. We Make Renewable Do-able!

"I have a PowerSave 3400 commercial / industrial unit installed in my 28,000 square foot, 4-story office building. The building is home to a number of different professional offices including attorneys, engineers and the United States military. I am seeing an average savings of at least 28% per month and I am very happy with the product. Extremely happy actually. As an example, prior to the installation of the PowerSave, my April 2006 electric bill was just over \$2700.00. I just received my April 2007 bill in the amount of \$1780.00. This product will literally pay for itself in only a few months."

Specifications:

- Three Phase
- Utilizes Self-Healing Low Loss Capacitors
- 20 Year Design Life
- Surge Suppression – 2000 Joules
- Typical Protection For : Electrical Storms, Lightning Activity & Power Utility Spikes
- Let Through Voltage – 150V line-to-neutral
- Load Rating – 20A (this means it discharges up to 20 amps at a time)
- Six-Way Electrical Protection
- EMI / RFI Noise Reduction 0-40dB
- The PU 3200 is rated for a 200 amp inductive load
- The PU 3400 is rated for a 400 amp inductive load
- When installing the 3200 use a 30 amp three pole breaker
- When installing the 3400 use a 40 amp three pole breaker
- Either unit will work in a 208/440 environment

THREE PHASE UNIT we call **PS3200**, sizes fractional motors up to 75hp

THREE PHASE UNIT we call **PS3400**, sizes motors 75hp up to 300hp

Both units are in NEMA 3 rated 7" x 7" x 8" enclosure
